

Has the Work Area Been Cleaned?

You need to know. They need to know.

With a wireless peel-and-stick solution, Banner Engineering has created tested and trusted monitoring and indication for industrial surface cleaning. In this era of COVID-19, create and maintain a clean, confident work culture.

Opt for low-cost, highly effective automation:

- Easy set up of equipment and customization of your cleaning schedule
- Indicator lights notify workers for cleaning, provide visual assurance of a clean area
- Materials resistant to cleaning chemicals; industrial, rugged housing
- Set schedules for more cleaning at peak times or by workcell area types (conveyors vs. common areas)
- Analytics and report generation for compliance
