FBP FieldBusPlug

System description, general information

The FieldBusPlug system allows simple, universal and intelligent integration of numerous switching devices and components into any automation system. Simple and flexible planning and integration also has an effect on the design and operation of machines and systems.

Typical devices

These are intelligent motor controllers, softstarters, circuit breakers, switch disconnector fuses and decentralized automation systems.

Communication interface

The listed devices are fieldbus-neutral. With the FieldBusPlug (FBP) they can be connected to the most common fieldbus system. And with the new MTQ22 interface to Ethernet networks.

Reduces multiplicity of devices

One single device version can be connected to different fieldbus systems via suitable FieldBusPlugs. This simplifies planning, development, service and storage.

Operational safety

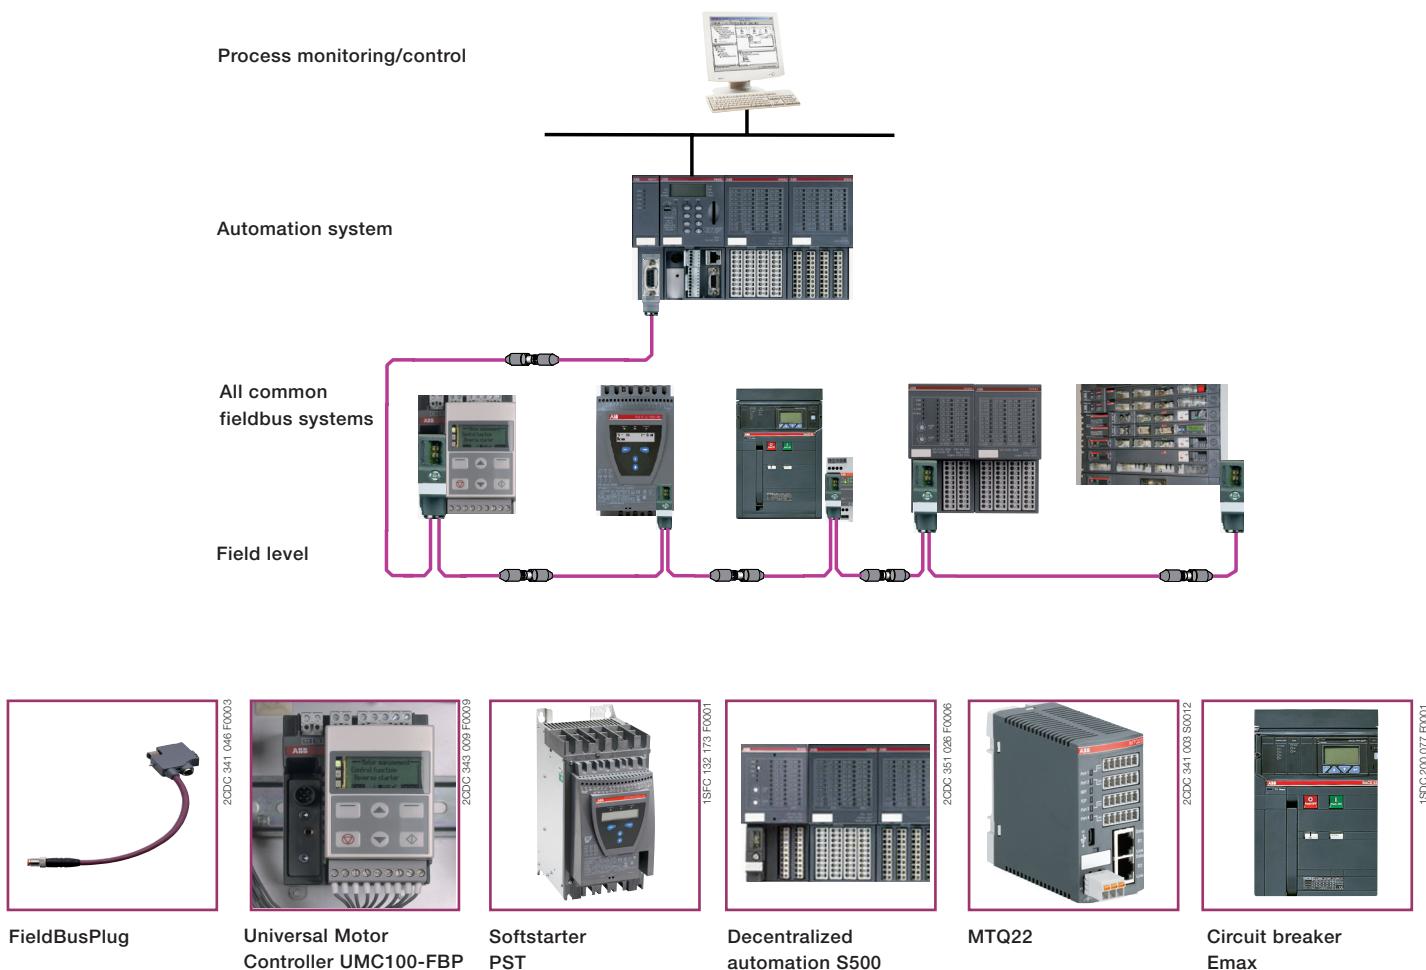

The M12 connection technology with ready-made components ensures easy assembly and high availability.

Large product portfolio

A comprehensive range of accessories, like cables, adapters, plugs and software tools rounds off the product range.

Simple integration

New tools based on the generally valid FDT / DTM (Device Type Manager) standard support planners and operators in configuring and implementing the systems.

FBP FieldBusPlug

Motor management, general information

With the Universal Motor Controller UMC100-FBP, ABB provides the optimum solution for integrating motor control into system control. The UMC100-FBP is a flexible, modularly expandable motor management system for low voltage motors with constant rotational speed. Its most important task is avoiding system downtimes through early detection of possible drive problems and reducing the associated downtimes through quick detection of the error cause if a motor stop has occurred.

Motor management and more

With its predefined control features and the option to optimally adapt the device to different system conditions due to its flexible logic, the UMC100-FBP is very well suited to varied applications. For complex applications with more I/Os or special signals, extension modules are available.

High system availability

The UMC100-FBP continuously provides extensive operating, service and diagnostic data of the motor. This enables the operator to detect faults in time or to even prevent these with suitable measures, or to limit their effect. Quick error location and elimination increases system availability.

Electronic full motor protection

The comprehensive electronic full motor protection is self-sufficient and guarantees full motor protection even if superordinated automation or process control systems or the bus system fail. The high accuracy of the electronic measuring system better utilizes the performance of the motors. The digital technology guarantees high long-term stability of the tripping characteristic and consistent tripping behavior even after many years of use.

Less planning, development and material effort

The UMC100-FBP already convinces during the planning and development phase due to its universal and modular structure. All required protection, monitoring and control features are integrated in one single device, which thus reduces the wiring effort. One single version for all current ranges and field buses simplifies planning and service from systems through to the spares inventory.

Simple integration in a confined space

Due to its compact design with integrated measuring system, the UMC100-FBP reduces the required floor space. This is important for application in low voltage drawer systems in conditions with limited space, or for conversion of existing systems to a modern motor management system.

Flexible integration into process control

With the FieldBusPlug, the UMC100 can communicate with control systems via the widespread standard fieldbus systems PROFIBUS DP, DeviceNet, CANopen or Modbus RTU.

The new interface MTQ22 enables Ethernet network communication via Modbus TCP. Allowing even network redundancy in an easy way.

Application in industrial plants

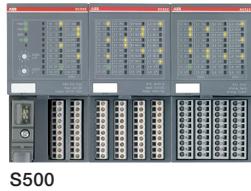

In large industrial systems it is quite common that several thousand motors are required to provide the required movement. This in turn requires intelligent devices on site, as well as a continuous connection from the process control and automation level through to the field. For this reason it is particularly important that motors can be easily integrated into system control and monitoring. With the FieldBusPlug system and the new UMC100-FBP motor management system, the best prerequisites are created for this. Intelligent motor management ensures high reliability in the process. The UMC100-FBP motor management system is easy to handle, from planning and implementation through to on-site service.

References worldwide

Due to the benefits it provides, the UMC100 is used worldwide in many segments and in projects with several thousand motor controllers

FBP FieldBusPlug

Further FBP terminal devices

S500

Decentralized S500 I/O components

Interface module DC505 with fieldbus-neutral interface for connection to FieldBusPlug. Expandable with I/O modules of the AC500 automation system for decentralized automation concepts.

Motor management system UMC100-FBP and accessories

Ordering details - Universal Motor Controller UMC100-FBP

UMC100-FBP

Description

Intelligent motor management system for three-phase motors with $I_e = 0,24 - 63$ A in one single device. Compact housing with integrated bushing-type current transformer for cable cross section up to 25 mm^2 (max. X with Insulation 11 mm). Higher currents with additional external current transformer. Thermal overload protection according to EN/IEC 60947-4-1, selectable trip classes 5E, 10E, 20E, 30E, 40E. (Some functions require the additional use of a voltage expansion module VI150 or VI155)

- Motor protection functions:
Over-/Underload, Over-/Undercurrent, Over-/Undervoltage, rotor blocking Phase failure / imbalance / sequence Earth fault detection integrated or with external sensor CEM11 Thermistor motor protection
- Motor control functions:
Easily configurable motor control functions: direct, reverse, star-delta starter, pole-changing, overload relay, actuator mode. Additionally free programmable application specific logic with function blocks
- Service and diagnostic data:
Operating hours, number of motor starts and overload trips
Motorstatus, faults and warnings, fault history (16 events)
Motor current, phase voltages, thermal load, power factor ($\cos \varphi$), active power, apparent power, energy, total harmonic distortion (THD).
- Integrated I/Os: 6 digital inputs, 1 PTC input, 4 digital outputs. Maximum number of I/Os with expansion module: 14 digital inputs, 1 PTC input, 8 digital outputs, 1 analogue output,
- Interface for FieldBusPlug for communication via fieldbus systems, Interface for operator panel UMC100-PAN, Bus interface for connection of expansion modules
- UMC100 requires 24 V DC power supply.

Motor management system UMC100-FBP and accessories

Expansion modules and accessories for Universal Motor Controller UMC100-FBP

Description

One I/O-expansion-module DX111 or DX122 and one voltage-expansion-module VI150 or VI155 can be connected to a UMC100. All expansion modules require 24 V DC power supply

DX111-FBP.0:

I/O-expansion module with 8 digital inputs 24 V DC, 4 relay outputs, 1 analog output 0/4...20 mA or 0...10 V

DX122-FBP.0:

I/O-expansion module with 8 digital inputs 110 / 230 V AC, 4 relay outputs, 1 analog output 0/4 - 0 mA or 0 - 10 V

VI150-FBP.0: Voltage expansion module for use in grounded networks, 150 – 690 V AC

VI155-FBP.0: Voltage expansion module for use in all networks, 150 – 690 V AC

Voltage modules for the determination of phase voltages, power factor ($\cos \varphi$), apparent power, energy, total harmonic distortion (THD)

Configuration software overview

Ordering details

Configuration software for the UMC100-FBP motor management system

The software screwdriver for your application

Asset Vision Basic is an FDT frame application with a modern and simple graphical user interface. It provides effective basic functionality for configuration, diagnosis and maintenance of intelligent low voltage switching devices from ABB. Furthermore, due to the open FDT interface, other ABB and 3rd party DTM can also be used.

Asset Vision Basic is the optimal tool for configuring FBP devices during commissioning, in the workshop or as second master in a PROFIBUS network of a process control system.

System requirements: Windows XP / Windows 7

Overview of features:

- Online/offline configuration and parameterization of devices
- Reading parameterization and configuration information from the device
- Online display of measuring and status data
- Online operation and error acknowledgement
- Creation of customer-specific logics
- Archiving

Connection to the device can either be via PROFIBUS (option 1) or as point to point connection directly to the device (option 2).

Ordering details - Configuration software (option 1): This option is recommended if the system comprises many devices.

PROFIBUS DP FieldBusPlugs and other FBP terminal devices

Ordering details

Profibus DP FieldBusPlug

Ready-made PROFIBUS DP fieldbus interface with various cable lengths. Supports PROFIBUS DP V0 and V1.

- Data transfer rate up to 12 Mbit/s.
- Certified PROFIBUS subscriber.
- Degree of protection: IP65.
- Diagnostic LED.
- A-coded M12 plug.
- Approvals: CE, cUL (other approvals in preparation).

PDP22-FBP

PROFIBUS DP FieldBusPlug for 4 devices

The PDQ22 is a member of the ABB FieldBusPlug family of bus connectors. It allows the connection of up to four devices to PROFIBUS DP by just using one PROFIBUS node address.

This allows cost-efficient integration of devices that are located physically nearby.

- The PDQ22 supports: Universal Motor Controllers UMC100, softstarters PSR2-105 and I/O pads WDI and WDI/O.
- Degree of protection: IP65.
- Separate LEDs for device status and bus status indication.
- Approvals: CE, cUL (other approvals in preparation).

Communicative motor starters with control functions

Technical data - UMC100-FBP

UMC100-FBP	
Main circuit	
Voltage (3-phase system)	1000 V AC (see manual), 45 ... 65 Hz, 3-phase system
Nominal motor current	0.24 ... 63 A with integrated current transformers, up to 850 A with external current transformers
Overload protection for 3-phase motors	According to EN/IEC 60947-4-1
Trip categories (adjustable)	5, 10, 20, 30, 40
Extended motor model	Cooling time definition by calculat. or configurat.
Feed-through holes of internal current transformer	25 mm ² max. (11 mm max. wire diameter incl. insulation)
Short-circuit protection	By fuse on line side
Control voltage circuit	
Supply voltage	24 V DC (+ 30 %, - 20 %, incl. residual ripple)
Current consumption incl. inputs, relays energized	360 mA
Total power dissipation	9 W max.
Reverse polarity protection	yes
Inputs/outputs	
Digital inputs	6 inputs 24 V DC
PTC Input	1
Digital outputs	3 relay outputs with common supply 1 transistor output 24 V DC, 0.2 A
Voltage switching capacity	24 V AC/DC ... 250 V AC/DC
Current switching capacity per relay	1.5 A max. 3 A max. 0.11 A max. 0.22 A max. 1 A max.
Load current via common	$I_{max} = 6 \text{ A gL / gG}$ (thermal limit)
Relay contact lifetime	> 500.000 switching cycles – mechanical > 100.000 switching cycles – at 250 V AC, 0,5 A > 50.000 switching cycles – at 250 V AC, 1,5 A
Contact wiring for inductive load	Free-wheeling diode for direct current, varistors/VDRs for alternating current
Interfaces	
Bus interface	1 (for connection of ABB FieldBusPlug)
Operating panel interface	1 (for connection of UMC100-PAN operating panel)
Interface for I/O expansion	1 (for connection of I/O expansion modules)
Integrated diagnostic functions	Green LED: Device ready for operation Yellow LED: Motor running (motor current > 20 % of nominal current adjusted) Red LED: Error (tripping, failure, ...) Operating hours, contactor switching cycles count, tripping events due to overload count Time period since last tripping event Error history Selectable warning & tripping limits Direct starting, reverse starting, star-delta starting, pole-changing starting, actuator/servo-drive, transparent mode, emergency start function, stand alone operation (even without bus connection) Time-controlled load shedding in case of voltage dips / configurable starting delay Overload monitoring, phase failure detection, motor blocking detection, thermal overload monitoring (PTC), earth fault monitoring with sensor CEM11-FBP Configurable checkback time, phase imbalance detection, fast blocking protection during starting
Further diagnostic functions	Operating panel, fieldbus (FieldBusPlug), DTM (DeviceTypeManager) Configurable logic
Integrated control functions	
Integrated motor protection functions	
Parameter setting / configuration	
Customer-specific applications	
General data	
Conductor cross section	1 x 0.2 - 2.5 mm ² max.
Mounting	On DIN rail or with screws (4 screws M4)
Dimensions	70 x 105 x 87.5 mm (110 mm incl. operating panel and FBP)
Weight	0.282 kg (0.622 lb)
Degree of protection	IP20
Temperature range	Storage: - 25 ... + 70 °C Operation: 0 ... + 60 °C
Approvals	ATEX, CCC, CE, cUL, GL, GOST (other approvals on request)
Operating panel (optional)	Adjustment and visualization of motor & device data and bus parameters, status indication of digital Inputs & outputs, contactor switching cycles and operating hours counting, local operation on site Graphical multilingual user interface
I/O expansion modules (optional)	2 I/O expansion modules

FBP terminal device data, overview

Techncial data - DX111, DX122

I/O expansion modules for Universal Motor Controller UMC100-FBP

The I/O expansion modules are exclusively intended to supplement the UMC100-FBP with additional inputs and outputs. Customer-specific adaptations are possible by means of logical interconnection of the I/O channels. The information is available for local functions and via the fieldbus. The PBTDM tool is required for configuration.

	DX111	DX122
Electrical data		
Supply voltage	24 V DC (+ 30 %, - 20 %) (19.2 ... 31.2 V DC incl. residual ripple)	
Current consumption incl. inputs, relays energized	90 mA max.	
Digital inputs		
Number of inputs	8 inputs in 2 groups of common reference potential (1 group with 5 inputs, 1 group with 3 inputs) Insulation: Type 1 acc. to EN 61131-1	8 inputs in 2 groups of common reference potential (1 group with 5 inputs, 1 group with 3 inputs) Insulation: Type 2 acc. to EN 61131-1
Input voltage	24 V DC	110 V AC ... 240 V AC
Input delay	6 ms typ.	20 ms typ.
Signal levels	0 state - 31.2 ... + 5 V 1 state + 15 ... + 31.2 V	0 ... 40 V AC 74 ... 265 V AC
ON current per channel	6.0 mA typ. (24 V DC)	10.0 mA typ. (230 V AC)
Input resistance against 0 V	3.9 kΩ	
Frequency range		45 ... 65 Hz
Digital outputs		
Number of digital outputs	4 relay outputs with 2 common supplies (1DO0 & 1DO1 by 1DOC; 2DO2 & 2DO3 by 2DOC)	
Voltage switching capacity	12 ... 250 V AC/DC	
Load current via common	$I_{max} = 6 \text{ A gl / gG}$ per common supply (1DOC, 2DOC)	
Minimum load for proper switching	1 W or 1 VA	
Contact wiring for inductive load	Free-wheeling diode for direct current, varistors/VDRs for alternating current	
Current switching capacity per relay	EN 60947-5-1 240 V AC (AC15) 1.5 A max. 120 V AC (AC15) 3 A max. 250 V DC (DC13) 0.11 A max. 125 V DC (DC13) 0.22 A max. 24 V DC (DC13) 1 A max.	
Relay contact lifetime	> 500.000 switching cycles – mechanical > 100.000 switching cycles – at 250 V AC, 0.5 A > 50.000 switching cycles – at 250 V AC, 1.5 A	
Analog output		
Number of analog outputs	1	
Connection type	2-wire, for motor current indication on an external analog instrument	
Output ranges	Configurable: 0/4 ... 20 mA or 0 ... 10 V	
Cable specification	< 30 m outside the control cabinet; > 30 m if shielded	
Max. output voltage	10 V	
Accuracy	< 5 %	
Output load	500 Ω max. if configured for 0/4 ... 20 mA output; 1 kΩ min. if configured for 0 ... 10 V output	
Resolution	8 bits	
Short-circuit detection	Yes, if configured for 0 ... 10 V output	
Wire break detection	Yes, if configured for 0/4 ... 20 mA output	
Insulation	none	
Interfaces		
Interface for I/O expansion	1 (for connection to UMC100-FBP or I/O expansion modules)	
Integrated diagnostic functions		
	Green LED: Device ready for operation Yellow LED: Wire break or short circuit indication Red LED: Error (loss of communication, failure, ...)	
General data		
Conductor cross section	2 x 0.75 - 2.5 mm ² max.	
Mounting	Snap-on mounting on DIN rail, any mounting position	
Dimensions	45 x 77 x 100 mm (without communication plug)	
Weight	0.220 kg	
Degree of protection	IP20	
Temperature range	Storage: - 25 ... + 70 °C Operation: 0 ... + 60 °C	Storage: - 25 ... + 70 °C Operation: 0 ... + 55 °C
Approvals		
	ATEX, CCC, CE, cUL, GL, GOST (other approvals on request)	

FBP terminal device data, overview

Technical data - VI150, VI155

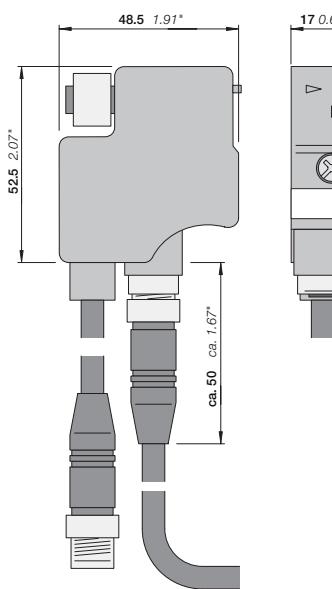

I/O expansion modules for Universal Motor Controller UMC100-FBP

The I/O expansion modules are exclusively intended to supplement the UMC100-FBP with additional inputs and outputs. Customer-specific adaptations are possible by means of logical interconnection of the I/O channels. The information is available for local functions and via the fieldbus. The PBTDM tool is required for configuration.

	VI150	VI155
Application	only in grounded networks	in grounded and ungrounded networks
Electrical data		
Supply voltage	24 V DC (+ 30 %, - 20 %) (19.2 ... 31.2 V DC including ripple)	
Current consumption relay energized	max. 40 mA	max. 55 mA
Voltage input	L1, L2, L3	
Overtoltage category	III in grounded networks	II in ungrounded networks
Nominal voltage input range (phase to phase)	150 - 690 V AC	
U_{imp}	8 kV	
Accuracy voltage	+/- 2% in nominal input range	
Accuracy power factor	+/- 3.5 % in range 0.4 ... 0.95, $I > 0.75 \text{ A}$	
Accuracy real power kW	+/- 5 % typ.	
Accuracy energy kWh	+/- 5 % typ.	
Total Harmonic Distortion THD	In %	
Rated operational voltage U_e	690 V AC	
Voltage supply cables	connection cables for voltage measurement may require additional cable protection	
Digital output		
Number	1 relay output	
Voltage switching capacity	12 ... 250 V AC/DC	
Current switching capacity	EN 60947-5-1	
240 V AC (AC15)	max. 1.5 A	
120 V AC (AC15)	max. 3 A	
250 V DC (DC13)	max. 0.11 A	
125 V DC (DC13)	max. 0.22 A	
24 V DC (DC13)	max. 1 A	
Minimum load for proper switching	1 W or 1 VA	
Contact wiring for inductive load	free-wheeling diode for DC, Varistors/VDRs for AC	
Relay contact lifetime	> 500.000 switching cycles – mechanical > 100.000 switching cycles – at 250 V AC, 0.5 A > 50.000 switching cycles – at 250 V AC, 1.5 A	
Interfaces		
Interface for I/O expansion	1 (zum Anschluss an UMC100-FBP und Digitalem Erweiterungsmodul)	
Integrated diagnostic functions		
	Green LED: Device ready	
	Yellow LED: Diagnostics	
	Red LED: Fault	
General data		
Conductor cross section	2 x 0.75 - 2.5 mm ² max.	
Mounting	snap-on mounting on DIN-rail, any mounting position Min. 10 mm distance left and right to the L1 and L3 terminals required for voltages > 230 / 400 V 22.5 x 77 x 100 mm (excl. communication connector)	
Dimensions (W x H x D)		
Weight	0.110 kg	
Degree of protection	IP20	
Temperature range	storage: - 25 ... + 70 °C, operation: 0 ... + 60 °C	
Operation altitude above sea level	max. 2000 m	max. 4000 m without derating
Approvals	ATEX, CCC, CE, cUL, GL, GOST (other approvals on request)

FBP FieldBusPlug

Configuration examples for the integration of other terminal devices to the FieldBusPlug system

AC500 automation devices connected via PROFIBUS DP

Automation device with fieldbus-neutral interface for connection to FieldBusPlug connector.

PROFIBUS line with intelligent and non-intelligent decentralized AC500 I/O devices

Ordering details

Description	Type	Order code	Price 1 pce	Weight (1 pce) kg (lb)
(1) Power supply unit 110 ... 240 V AC/24 V DC, 10 A	CP-S 24/10.0	1SVR427015R0100	1.107 (2.441)	
(2) Adapter SubD-9 - M12 (A-coded)	PDA11-FBP.050	1SAJ924009R0005	0.113 (0.249)	
	PDP22-FBP.025	1SAJ240100R1003	0.120 (0.265)

FBP FieldBusPlug

Configuration examples for the integration of other terminal devices to the FieldBusPlug system

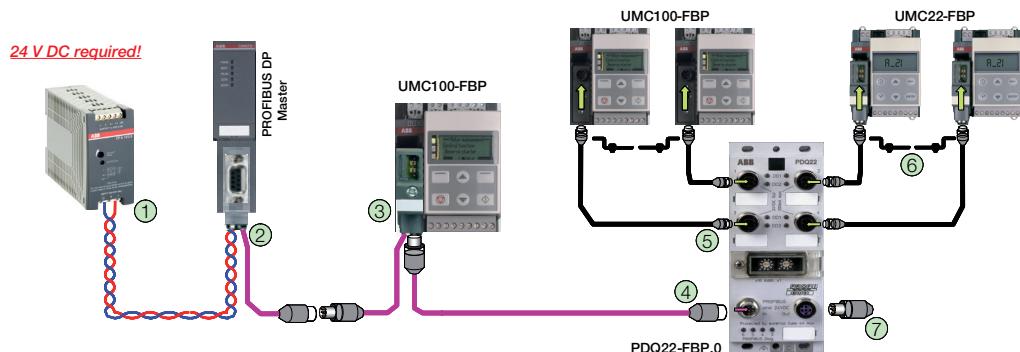

UMC100-FBP
DX122-FBP

PDQ22-FBP

Several Universal Motor Controllers on one PROFIBUS DP node

Up to 4 FBP devices can be connected to one PROFIBUS DP distributor. The fieldbus-neutral interface of each FBP device is connected to the fieldbus-neutral interface of the distributor.

Ordering details

Description	Type	Order code	Price 1 pce	Weight (1 pce) kg (lb)
(1) Power supply unit 110 ... 240 V AC/24 V DC, 2.5 A	CP-E 24/2.5	1SVR427032R0000	0.331 (0.730)

FBP FieldBusPlug

Configuration examples for the integration of Universal Motor Controllers into MCCs

Motor management
UMC100-FBP

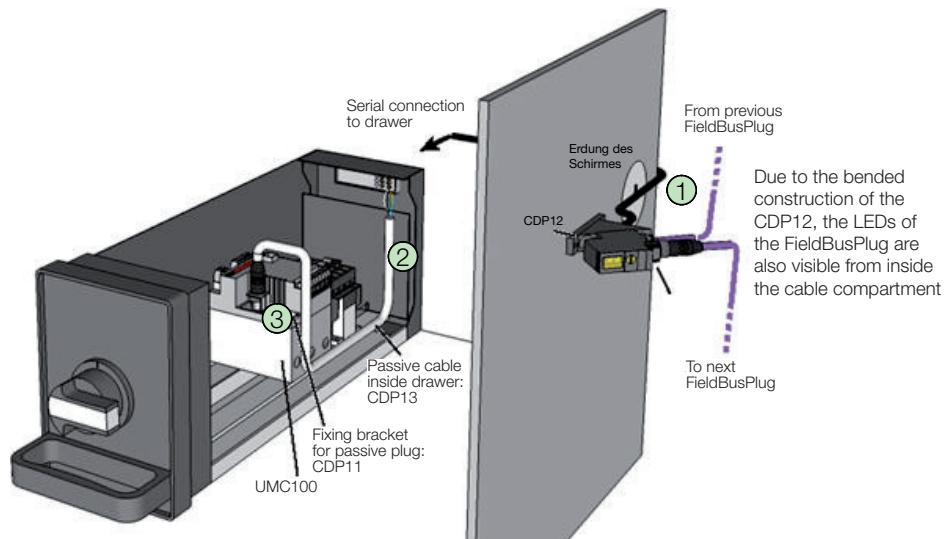

Operating panel
UMC100-PAN

Universal Motor Controllers in Motor Control Centers (MCCs)

Components for installation of Universal Motor Controller UMC100-FBP to an MCC using drawer systems. Configurations with up to four controllers connected to one PROFIBUS DP node are supported.

Single Universal Motor Controller on a PROFIBUS DP node

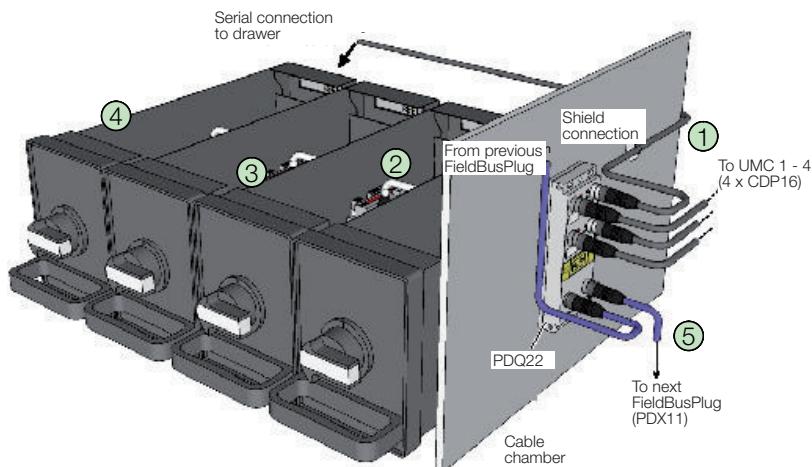

Ordering details

Description	Type	Order code	Price 1 pce	Weight (1 pce) kg (lb)
(1) Passive cable for drawer systems (outside)	CDP12-FBP.100	1SAJ929120R0001	0.070 (0.154)	
(2) Passive cable for drawer systems (inside)	CDP13-FBP.100	1SAJ929110R0001	0.099 (0.218)	
(3) Fixing bracket for passive plug	CDP11-FBP.0	1SAJ929100R0001	0.010 (0.220)
