## Overview

The Q20-2 polarized retroreflective sensors offer excellent sensing performance in a compact plastic housing which are easily integrated into tight spaces.

Threaded brass inserts provide stable mounting points, and the bright indicators provide user feedback of the sensor status. The single turn gain potentiometer, LO/DO switch, and bright indicator LEDs provide easy alignment and configuration for reliable sensing.

- 2) Yellow: Light Sensed Indicator (flashes for marginal conditions)
- 3) Single-turn Gain Potentiometer (some models)
- 4) Light Operate/Dark Operate Switch (some models)

## Mount the Device

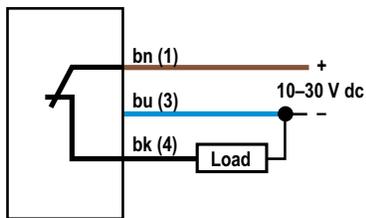

1. If a bracket is needed, mount the device onto the bracket.
2. Mount the device (or the device and the bracket) to the machine or equipment at the desired location. Do not tighten the mounting screws at this time.
3. Check the device alignment.
4. Tighten the mounting screws to secure the device (or the device and the bracket) in the aligned position.
