notice

On hinged guards, minimum actuating radius at 90° to the plane of the actuator 140 mm

minimum actuating radius on hinged guards in line with the plane of the actuator 200 mm

The axis of the hinge should be 13 mm above the top edge of the safety switch and in the same plane

The actuator is not available separately.

This type termination (IDC) method enables simple connection of flexible conductors without the need for the use of conductor ferrules
