What is the ACS150 customer value?

■ Dramatically reduced programming time and costs

- Replicate parameters in seconds with no power to the drive with new FlashDrop technology
- Pre-configure drives prior to delivery
- Replicate parameter sets across machines
- Hide selected parameters
- Spare drives are configured
- Optimal installation layout with unified height and depth for all frames.
- Reduced cost with built-in brake chopper and EMC filter
- Reduced wiring time and costs for I/O and quick, simple and easy access control connections

The ABB component drives meet the requirements of OEMs, system integrators and panel builders. It is a component that is bought together with other components. The drive is stocked, and the number of options and variants are optimized for distribution.

Where can it be used?

ABB component drives are designed to meet the requirements of an extensive range of machinery applications. The drive is ideal for food and beverage, material handling, textile, printing, rubber and plastics and woodworking applications.

Highlights

- FlashDrop- easy to set and select parameters without power
- Integral operator interface clear display with buttons
- Integral potentiometer for frequency setting
- Integrated EMC filter for 2nd environment
- Built-in brake chopper as standard
- Coated boards as standard
- Unified height and depth
- NEMA 1 Kit
- Flexible installation
- RoHS (verify label)

Applications

- Fans
- Pumps
- Gate control
- Material handling
- Conveyors

What are the ACS150's main features and benefits supporting customer value?

Features	Benefits	Notes
FlashDrop	Easy and time-saving. Cost-saving for machine builders.	Fast and trouble free parameter set up without power.
Fixed interface	Integrated non-removable control panel. Clear LCD display with backlight and buttons.	Simple to use
Fixed potentiometer	Integrated potentiometer. Settings shown on the control panel	Easy speed setting.
Built-in EMC filter	No extra space, parts, time and cost required	2 nd environment built in filter complying with IEC61800-3 as standard
Built-in brake chopper	Reduced cost. Gives freedom to choose the resistor supplier.	100% braking capability.
Flexible installation	All units fit in the same sized cabinet	Unified height and depth for all frame sizes for optimal use of cabinet space. Sideways, side by side and DIN-rail mounting configuration
Coated boards	Longer lifetime in hostile environments. Reduced service.	Protection against moisture and hostile particles as standard

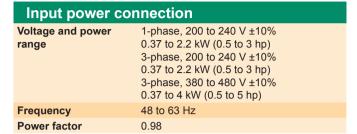

Technical Specification

ACS150

01U

02A4

Motor connection					
Voltage	3-phase, from 0 to U _{supply}				
Frequency	0 to 500 Hz				
Continuous loading capability (constant torque at a max. ambient temperature 40°C)	Rated output current I _{2N}				
Overload capability (at a max. ambient temperature of 40°C)	At heavy duty use 1.5 x I_{2N} for 1 minute every 10 minutes At start 1.8 x I_{2N} for 2 s				
Switching frequency Default Selectable	4 kHz 4 to 12 kHz with 4 kHz steps (16 kHz, v1.31b+)				
Acceleration time	0.1 to 1800 s				
Deceleration time	0.1 to 1800 s				
Braking	Inbuilt brake chopper standard (100% braking capability)				

Environmental limits						
Ambient temperature	-10 to 40°C (14 to 104°F), no frost allowed, 50°C (122°F) with 10% derating					
Altitude Output current	Rated current available at 0 to 1000 m (0 to 3281 ft) reduced by 1% per 100 m					
	(328 ft) over 1000 to 2000 m (3281 to 6562 ft)					
Relative humidity	Lower than 95% (without condensation)					
Protection class	IP 20 / Protected Chassis					
Enclosure color	NCS 1502-Y, RAL 9002, PMS 420 C					
Contamination levels	IEC721-3-3 No conductive dust allowed					
Transportation	Class 1C2 (chemical gases) Class 1S2 (solid particles)					
Storage	Class 2C2 (chemical gases) Class 2S2 (solid particles)					
Operation	Class 3C2 (chemical gases) Class 3S2 (solid particles)					

Programmable control connections One analog input 0 (2) to 10 V, $R_{in} > 312 \text{ k}\Omega$ Voltage signal Current signal 0 (4) to 20 mA, R_{in} = 100 Ω Resolution 0.1 % ±1% Accuracy Potentiometer reference 10V ±1% max, 10 mA R< 10 k Ω Auxiliary voltage 24 V DC ±10%, max. 200 mA 12 to 24 V DC with internal or Five digital inputs external supply, PNP and NPN, pulse train 0 to 16 kHz. Type code

This is a unique reference number that clearly identifies the drive by power rating, voltage, and construction. Once you have selected the type code, the frame size can be used to determine the drives dimensions, shown below.

Voltages

The ACS150 is available in two voltage ranges:

2 = 200 - 240 V

4 = 380 - 480 V

Construction

"01U" and "03U" within the type code indicates the number of phases for power.

01 = 1-phase (200 - 240V only)

03 = 3-phase (200 - 240V and 380 - 480V)

U = EMC filter disconnected, 60 Hz motor data (In case the filter is required it can easily be connected.)

Type code Frame Ratings

Options

FlashDrop (MFDT-01)

FlashDrop (MFDT-01) is a powerful palm sized tool for fast and easy parameter selecting and setting. This tool can be used to download parameters to a drive in as little as two seconds. Using this tool, it is also possible to hide selected parameters to protect the machine. Only the parameters needed in the application are shown. FlashDrop does not require the drive to be powered. The drives shipping container is also designed to allow use of the FlashDrop tool without removing the drive. The MFDT-01 includes the DrivePM (Drive Parameter Manager) software tool to create, edit and copy parameter sets.

- DrivePM requirements
- Windows 2000/XP
- Free serial port from a PC

FlashDrop tool includes

- FlashDrop
- DrivePM software on a CD-rom
- User's manual in pdf-format on the previous CD-rom
- Cable for connection between the PC and FlashDrop
- Battery charger

NEMA 1 Kit (MUL1-R1)

The NEMA 1 kit MUL1-R1 includes a conduit box and hood for protection against dirt and dust. The MUL1-R1 covers all ACS150 frame sizes.

ACS150 with MUL1-R1 NEMA 1 kit

Options

All ACS150 drives are configured with a built-in brake chopper capable of 100% braking. By connecting an external resistor you can enable the dynamic braking function. The minimum and maximum resistance and the required power is shown in the table. Ensure the resistor purchased does not exceed the maximum resistance nor is smaller than the minimum resistance. For more information about the selection of brake resistors, see the ACS150 User's Manual (3AFE68576032) and ACS150 Product Pricing List (ACS150-PNPL01U-EN).

Technical data

Cooling

The ACS150 is configured with cooling fans as standard. The cooling air must be free from corrosive materials and must not be above the maximum ambient temperature of 40°C (50°C with derating). For more specific limits, see the Technical specification - Environmental limits in this catalog.
