FRS-R - 600Vac/300Vdc, 1⁄10-60A, Dual Element, Time-Delay Fuses

Description: Advanced protection, energy efficient Class RK5 dual element, current-limiting, time-delay fuses with optional open fuse indication on select ratings.
Time-delay - 10 second (minimum) at 500\% of rated current.
Catalog Symbol: FRS-R-(amp) (non-inducating) FRS-R-(amp)ID (indicating
Ratings:
Volts $-600 \mathrm{Vac}, 300 \mathrm{Vdc}(1 / 10-30 \mathrm{~A})$

- 600Vac, 250Vdc (35-60A)

Amps - 1/10-60A
IR - 200kA Vac RMS Sym.

- 20kA Vdc

## Agency Information:

CE, UL Listed, Std. 248-12, Class RK5, Guide JDDZ, File E4273
CSA Certified, C22.2 No. 248.12, Class 1422-02, File 53787

## Catalog Numbers (amps) - Non-indictaing fuses

| FRS-R-1\% | FRS-R-71/2* |  |

* Open fuse indication available by inserting the sufix "ID." E.g., FRS-R-15ID.

## Carton Quantity and Weight

| Amp Rating | Carton Qty. |
| :--- | :---: |
| $1 / 10-15$ | 10 |
| $171 / 2-30$ | 10 |
| $35-60$ | 10 |

Dimensions - in

## Features:

- Provides motor overload, ground fault and short-circuit protection. When used in circuits subject to surge currents such as those caused by motors, transformers and other inductive components, these fuses can be sized close to full-load amps to give maximum overcurrent protection.
- Permits the use of smaller and less costly switches. The time-delay feature makes it possible to use fuse amp ratings which are much smaller than those of non-time delay fuses. Considerable cost saving occurs by permitting the use of smaller size switches, panels and fuses themselves.
- Provides a higher degree of short-circuit protection (greater current-limitation) in circuits in which surge currents or temporary overloads occur.
- Helps protect motors against burnout from overloads
- Gives motor running back-up protection to motors without extra costs
- Helps protect motors against burnout from single phasing on three phase systems
- Simplifies and improves blackout prevention (selective coordination)
- Dual-element fuses can be applied in circuits subject to temporary motor overloads and surge currents to provide both high-performance, short-circuit and overload protection
- The overload element provides protection against low level overcurrent of overloads and will hold an overload which is five times greater than the amp rating of the fuse for a minimum of ten seconds

## Recommended Fuse Blocks

| Fuse Amps | 1-Pole | 2-Pole | 3-Pole |
| :--- | :---: | :---: | :---: |
| $\mathbf{0 - 3 0}$ | R60030-1 | R60030-2 | R60030-3 |
| $35-60$ | R60060-1 | R60060-2 | R60060-3 |

For additional information on the R600 Series of 600 volt fuse blocks, see Data Sheet \# 1111.
